

O-780-22

**TRADE MARKS ACT 1994
IN THE MATTER OF APPLICATION No. 3665324
BY WENDY VERNON-FULBROOK
TO REGISTER THE TRADE MARK**

SWILD

IN CLASS 25

AND

**IN THE MATTER OF OPPOSITION THERETO
UNDER No. 427785 JOINTLY BY
JEEROME BASSELIER & JULIETTE SWILDENS**

BACKGROUND

1) On 6 July 2021, Wendy Vernon-Fulbrook (hereinafter the applicant) applied to register the trade mark “Swild” in respect of the following goods in Class 25: Clothing; leisure clothing; sports clothing; jerseys [clothing]; casual clothing.

2) The application was examined and accepted, and subsequently published for opposition purposes on 27 August 2021 in Trade Marks Journal No.2021/035.

3) On 27 October 2021 Jerome Basselier & Juliette Swildens (hereinafter the opponents) jointly filed a notice of opposition. The opponents are the proprietor of the following trade mark:

Mark	Number	Dates of filing & registration	Class	Specification relied upon
SWILDENS	904824901	10.01.06 13.02.07 Priority date 21.07.05 France	25	Clothing, footwear, headgear.

4) The sole ground of opposition is in summary:

- a) The opponents contend that the marks and goods of the two parties are highly similar. The mark in suit therefore offends against Section 5(2)(b).

5) On 27 December 2021 the applicant filed a counterstatement, in which she denies the grounds of opposition. The applicant puts the opponents to strict proof of use.

6) Only the opponents are professionally represented. Only the opponents filed evidence but both sides ask for an award of costs. Neither side wished to be heard and only the opponents provided written submissions which I shall refer to as and when required.

7) Although the UK has left the EU, section 6(3)(a) of the European Union (Withdrawal) Act 2018 requires tribunals to apply EU-derived national law in accordance with EU law as it stood at the end of the transition period. The provisions of the Act relied upon in these proceedings are derived from an EU Directive. That is why this decision continues to refer to EU trade mark law.

DECISION

8) I will consider the sole ground of opposition under section 5(2)(b) which reads:

“5.-(2) A trade mark shall not be registered if because -

(a)

(b) it is similar to an earlier trade mark and is to be registered for goods or services identical with or similar to those for which the earlier trade mark is protected,

there exists a likelihood of confusion on the part of the public, which includes the likelihood of association with the earlier trade mark.”

9) An “earlier trade mark” is defined in section 6, the relevant part of which states:

“6.-(1) In this Act an “earlier trade mark” means -

(a) a registered trade mark, international trade mark (UK) or Community trade mark which has a date of application for registration earlier than that of the trade mark in question, taking account (where appropriate) of the priorities claimed in respect of the trade marks.”

10) Section 6A reads:

“(1) This section applies where

(a) an application for registration of a trade mark has been published,

(b) there is an earlier trade mark of a kind falling within section 6(1)(a), (aa) or (ba) in relation to which the conditions set out in section 5(1), (2) or (3) obtain, and

(c) the registration procedure for the earlier trade mark was completed before the start of the relevant period.

(1A) In this section “the relevant period” means the period of 5 years ending with the date of the application for registration mentioned in subsection (1)(a) or (where applicable) the date of the priority claimed for that application.

(2) In opposition proceedings, the registrar shall not refuse to register the trade mark by reason of the earlier trade mark unless the use conditions are met.

(3) The use conditions are met if –

(a) within the relevant period the earlier trade mark has been put to genuine use in the United Kingdom by the proprietor or with his consent in relation to the goods or services for which it is registered, or

(b) the earlier trade mark has not been so used, but there are proper reasons for non- use.

(4) For these purposes -

(a) use of a trade mark includes use in a form (the “variant form”) differing in elements which do not alter the distinctive character of the mark in the form in which it was registered (regardless of whether or not the trade mark in the variant form is also registered in the name of the proprietor), and

(b) use in the United Kingdom includes affixing the trade mark to goods or to the packaging of goods in the United Kingdom solely for export purposes.

(5)-(5A) [Repealed]

(6) Where an earlier trade mark satisfies the use conditions in respect of some only of the goods or services for which it is registered, it shall be treated for the purposes of this section as if it were registered only in respect of those goods or services.”

11) The opponents are relying upon their trade mark listed in paragraph 3 above which is clearly an earlier trade mark. The mark in suit was applied for on 6 July 2021 at which point the opponents mark had been registered for over five years. Therefore, the proof of use requirements bite.

12) Section 100 of the Act states that:

“100. If in any civil proceedings under this Act a question arises as to the use to which a registered trade mark has been put, it is for the proprietor to show what use has been made of it.”

13) In *Walton International Ltd & Anor v Verweij Fashion BV* [2018] EWHC 1608 (Ch) Arnold J (as he then was) summarised the law relating to genuine use as follows:

“114.....The CJEU has considered what amounts to “genuine use” of a trade mark in a series of cases: Case C-40/01 *Ansul BV v Ajax Brandbeveiliging BV* [2003] ECR I-2439, *La Mer* (cited above), Case C-416/04 P *Sunrider Corp v Office for Harmonisation in the Internal Market (Trade Marks and Designs)* [2006] ECR I-4237, Case C-442/07 *Verein Radetsky-Order v Bunderversvereinigung Kamaradschaft ‘Feldmarschall Radetsky’* [2008] ECR I-9223, Case C-495/07 *Silberquelle GmbH v Maselli-Strickmode GmbH* [2009] ECR I-2759, Case C-149/11 *Leno Marken BV v Hagelkruis Beheer BV* [EU:C:2012:816], [2013] ETMR 16, Case C-609/11 P *Centrotherm Systemtechnik GmbH v Centrotherm Clean Solutions GmbH & Co KG* [EU:C:2013:592], [2014] ETMR, Case C-141/13 P *Reber Holding & Co KG v Office for Harmonisation in the Internal Market (Trade Marks and Designs)* [EU:C:2014:2089] and Case C-689/15 *W.F. Gözze Frottierweberei GmbH v Verein Bremer Baumwollbörse* [EU:C:2017:434], [2017] Bus LR 1795.

115. The principles established by these cases may be summarised as follows:

(1) Genuine use means actual use of the trade mark by the proprietor or by a third party with authority to use the mark: *Ansul* at [35] and [37].

(2) The use must be more than merely token, that is to say, serving solely to preserve the rights conferred by the registration of the mark: *Ansul* at [36]; *Sunrider* at [70]; *Verein* at [13]; *Leno* at [29]; *Centrotherm* at [71]; *Reber* at [29].

(3) The use must be consistent with the essential function of a trade mark, which is to guarantee the identity of the origin of the goods or services to the consumer or end user by enabling him to distinguish the goods or services from others which have another origin: *Ansul* at [36]; *Sunrider* at [70]; *Verein* at [13]; *Silberquelle* at [17]; *Leno* at [29]; *Centrotherm* at [71]. Accordingly, affixing of a trade mark on goods as a label of quality is not genuine use unless it guarantees, additionally and simultaneously, to consumers that those goods come from a single undertaking under the control of which the goods are manufactured and which is responsible for their quality: *Gözze* at [43]-[51].

(4) Use of the mark must relate to goods or services which are already marketed or which are about to be marketed and for which preparations to secure customers are under way, particularly in the form of advertising campaigns: *Ansul* at [37]. Internal use by the proprietor does not suffice: *Ansul* at [37]; *Verein* at [14] and [22]. Nor does the distribution of promotional items as a reward for the purchase of other goods and to encourage the sale of the latter: *Silberquelle* at [20]-[21]. But use by a non-profit making association can constitute genuine use: *Verein* at [16]-[23].

(5) The use must be by way of real commercial exploitation of the mark on the market for the relevant goods or services, that is to say, use in accordance with the commercial *raison d'être* of the mark, which is to create or preserve an outlet for the goods or services that bear the mark: *Ansul* at [37]-[38]; *Verein* at [14]; *Silberquelle* at [18]; *Centrotherm* at [71]; *Reber* at [29].

(6) All the relevant facts and circumstances must be taken into account in determining whether there is real commercial exploitation of the mark, including: (a) whether such use is viewed as warranted in the economic sector concerned to maintain or create a share in the market for the goods and services in question; (b) the nature of the goods or services; (c) the characteristics of the market concerned; (d) the scale and frequency of use of the mark; (e) whether the mark is used for the purpose of marketing all the goods and services covered by the mark or just some of them; (f) the evidence

that the proprietor is able to provide; and (g) the territorial extent of the use: *Ansul* at [38] and [39]; *La Mer* at [22]-[23]; *Sunrider* at [70]-[71], [76]; *Leno* at [29]-[30], [56]; *Centrotherm* at [72]-[76]; *Reber* at [29], [32]-[34].

(7) Use of the mark need not always be quantitatively significant for it to be deemed genuine. Even minimal use may qualify as genuine use if it is deemed to be justified in the economic sector concerned for the purpose of creating or preserving market share for the relevant goods or services. For example, use of the mark by a single client which imports the relevant goods can be sufficient to demonstrate that such use is genuine, if it appears that the import operation has a genuine commercial justification for the proprietor. Thus there is no *de minimis* rule: *Ansul* at [39]; *La Mer* at [21], [24] and [25]; *Sunrider* at [72] and [76]-[77]; *Leno* at [55].

(8) It is not the case that every proven commercial use of the mark may automatically be deemed to constitute genuine use: *Reber* at [32].”

14) In *Awareness Limited v Plymouth City Council*, Case BL O/236/13, Mr Daniel Alexander Q.C. as the Appointed Person stated that:

“22. The burden lies on the registered proprietor to prove use..... However, it is not strictly necessary to exhibit any particular kind of documentation, but if it is likely that such material would exist and little or none is provided, a tribunal will be justified in rejecting the evidence as insufficiently solid. That is all the more so since the nature and extent of use is likely to be particularly well known to the proprietor itself. A tribunal is entitled to be sceptical of a case of use if, notwithstanding the ease with which it could have been convincingly demonstrated, the material actually provided is inconclusive. By the time the tribunal (which in many cases will be the Hearing Officer in the first instance) comes to take its final decision, the evidence must be sufficiently solid and specific to enable the evaluation of the scope of protection to which the proprietor is legitimately entitled to be properly and fairly undertaken, having regard to the interests of the proprietor, the opponent and, it should be said, the public.”

and further at paragraph 28:

“28. I can understand the rationale for the evidence being as it was but suggest that, for the future, if a broad class, such as “tuition services”, is sought to be defended on the basis of narrow use within the category (such as for classes of a particular kind) the evidence should not state that the mark has been used in relation to “tuition services” even by compendious reference to the trade mark specification. The evidence should make it clear, with precision, what specific use there has been and explain why, if the use has only been narrow, why a broader category is nonetheless appropriate for the specification. Broad statements purporting to verify use over a wide range by reference to the wording of a trade mark specification when supportable only in respect of a much narrower range should be critically considered in any draft evidence proposed to be submitted.”

15) In *Dosenbach-Ochsner Ag Schuhe Und Sport v Continental Shelf 128 Ltd*, Case BL 0/404/13, Mr Geoffrey Hobbs Q.C. as the Appointed Person stated that:

“21. The assessment of a witness statement for probative value necessarily focuses upon its sufficiency for the purpose of satisfying the decision taker with regard to whatever it is that falls to be determined, on the balance of probabilities, in the particular context of the case at hand. As Mann J. observed in *Matsushita Electric Industrial Co. v. Comptroller- General of Patents* [2008] EWHC 2071 (Pat); [2008] R.P.C. 35:

[24] As I have said, the act of being satisfied is a matter of judgment. Forming a judgment requires the weighing of evidence and other factors. The evidence required in any particular case where satisfaction is required depends on the nature of the inquiry and the nature and purpose of the decision which is to be made. For example, where a tribunal has to be satisfied as to the age of a person, it may sometimes be sufficient for that person to assert in a form or otherwise what his or her age is, or what their date of birth is; in others, more formal proof in the form of, for example, a birth certificate will be required. It all

depends who is asking the question, why they are asking the question, and what is going to be done with the answer when it is given. There can be no universal rule as to what level of evidence has to be provided in order to satisfy a decision-making body about that of which that body has to be satisfied.

22. When it comes to proof of use for the purpose of determining the extent (if any) to which the protection conferred by registration of a trade mark can legitimately be maintained, the decision taker must form a view as to what the evidence does and just as importantly what it does not 'show' (per Section 100 of the Act) with regard to the actuality of use in relation to goods or services covered by the registration. The evidence in question can properly be assessed for sufficiency (or the lack of it) by reference to the specificity (or lack of it) with which it addresses the actuality of use."

16) In determining a fair specification I take into account the comments in *Euro Gida Sanayi Ve Ticaret Limited v Gima (UK) Limited*, BL O/345/10, where Mr Geoffrey Hobbs Q.C. as the Appointed Person summed up the law as being:

"In the present state of the law, fair protection is to be achieved by identifying and defining not the particular examples of goods or services for which there has been genuine use but the particular categories of goods or services they should realistically be taken to exemplify. For that purpose the terminology of the resulting specification should accord with the perceptions of the average consumer of the goods or services concerned."

17) I also note that in *Property Renaissance Ltd (t/a Titanic Spa) v Stanley Dock Hotel Ltd (t/a Titanic Hotel Liverpool) & Ors* [2016] EWHC 3103 (Ch), Mr Justice Carr summed up the law relating to partial revocation as follows (at [47]):

"iii) Where the trade mark proprietor has made genuine use of the mark in respect of some goods or services covered by the general wording of the specification, and not others, it is necessary for the court to arrive at a fair specification in the circumstance, which may require amendment; *Thomas Pink Ltd v Victoria's Secret UK Ltd* [2014] EWHC 2631 (Ch) ("Thomas Pink") at [52].

iv) In cases of partial revocation, pursuant to section 46(5) of the Trade Marks Act 1994, the question is how would the average consumer fairly describe the services in relation to which the trade mark has been used; *Thomas Pink* at [53].

v) It is not the task of the court to describe the use made by the trade mark proprietor in the narrowest possible terms unless that is what the average consumer would do. For example, in *Pan World Brands v Tripp Ltd* (Extreme Trade Mark) [2008] RPC 2 it was held that use in relation to holdalls justified a registration for luggage generally; *Thomas Pink* at [53].

vi) A trade mark proprietor should not be allowed to monopolise the use of a trade mark in relation to a general category of goods or services simply because he has used it in relation to a few. Conversely, a proprietor cannot reasonably be expected to use a mark in relation to all possible variations of the particular goods or services covered by the registration. *Maier v Asos Plc* [2015] EWCA Civ 220 ("Asos") at [56] and [60].

vii) In some cases, it may be possible to identify subcategories of goods or services within a general term which are capable of being viewed independently. In such cases, use in relation to only one subcategory will not constitute use in relation to all other subcategories. On the other hand, protection must not be cut down to those precise goods or services in relation to which the mark has been used. This would be to strip the proprietor of protection for all goods or services which the average consumer would consider to belong to the same group or category as those for which the mark has been used and which are not in substance different from them; *Mundipharma AG v OHIM* (Case T-256/04) ECR II-449; EU:T:2007:46."

18) Further, in *Merck KGaA v Merck Sharp & Dohme Corp & Ors* [2017] EWCA Civ 1834 (Court of Appeal), a case which concerned pharmaceutical substances and preparations, Kitchen LJ held that it was well established that (1) a category of goods/services may contain numerous subcategories capable of being viewed independently and, (2) the purpose and intended use of a pharmaceutical product are of particular importance in identifying the subcategory to which it belongs.

19) The opponents filed a witness statement, dated 22 March 2022, by Jerome Basselier co-founder of the opponents. He has extensive knowledge of the opponents' activities and full access to its records. He states that the brand SWILDENS was created in 2006 and used in France until 2016 when the brand expanded into other EU countries. These included Denmark, Belgium, the Netherlands and the UK. The company sells clothing for men and women. During the six year period 2016 - 2021 the wholesale revenues have averaged approximately €2 million per annum of which approximately €33,000 per annum was sold in the UK. Additional sales have also been made on the Internet but these amount to approximately €550,000 per annum of which only about €7,000 is in the UK. To substantiate these claims, he provides a number of exhibits which I detail below.

- JB02-JB05: Copies of invoices which show clothing and shoes being supplied to retailers in France, Belgium, Denmark and the UK.
- JB06-JB08: Copies of sales agreements for Denmark, Belgium, Luxembourg, UK and France.
- JB09: Screenshots of the company website for the years 2016-2021 which include some in English.
- JB11-JB14: Documents showing the advertising carried out by the opponents. This all seems to be aimed at the French market.
- JB15: Social media posts which are also in French.

20) The evidence provided is far from overwhelming. The invoices which are in French appear to only show sales of clothing and footwear. The European market for clothing and footwear would be measured in €billions, whereas the opponents' turnover is miniscule in comparison. However, whilst this may mean that the opponents do not enjoy an extensive, if any, reputation, it does not mean that they have not put their mark to genuine use. Whilst the opponents do not so much clear the first hurdle as slide over it like a greased spaniel, I am willing to accept that they have shown use of their mark upon clothing and footwear in the UK during the five-year period prior to the application being filed. I do not accept that the opponent has shown use upon "headgear" in this five year period.

21) When considering the issue under section 5(2)(b) I take into account the following principles which are gleaned from the decisions of the EU courts in *Sabel BV v Puma AG*, Case C-251/95, *Canon Kabushiki Kaisha v Metro-Goldwyn-Mayer Inc*, Case C-39/97, *Lloyd Schuhfabrik Meyer & Co GmbH v Klijsen Handel B.V.* Case C-342/97, *Marca Mode CV v Adidas AG & Adidas Benelux BV*, Case C-425/98, *Matratzen Concord GmbH v OHIM*, Case C-3/03, *Medion AG v. Thomson Multimedia Sales Germany & Austria GmbH*, Case C-120/04, *Shaker di L. Laudato & C. Sas v OHIM*, Case C-334/05P and *Bimbo SA v OHIM*, Case C-591/12P.

(a) The likelihood of confusion must be appreciated globally, taking account of all relevant factors;

(b) the matter must be judged through the eyes of the average consumer of the goods or services in question, who is deemed to be reasonably well informed and reasonably circumspect and observant, but who rarely has the chance to make direct comparisons between marks and must instead rely upon the imperfect picture of them he has kept in his mind, and whose attention varies according to the category of goods or services in question;

(c) the average consumer normally perceives a mark as a whole and does not proceed to analyse its various details;

(d) the visual, aural and conceptual similarities of the marks must normally be assessed by reference to the overall impressions created by the marks bearing in mind their distinctive and dominant components, but it is only when all other components of a complex mark are negligible that it is permissible to make the comparison solely on the basis of the dominant elements;

(e) nevertheless, the overall impression conveyed to the public by a composite trade mark may be dominated by one or more of its components;

(f) however, it is also possible that in a particular case an element corresponding to an earlier trade mark may retain an independent distinctive role in a composite mark, without necessarily constituting a dominant element of that mark;

(g) a lesser degree of similarity between the goods or services may be offset by a great degree of similarity between the marks, and vice versa;

(h) there is a greater likelihood of confusion where the earlier mark has a highly distinctive character, either per se or because of the use that has been made of it;

(i) mere association, in the strict sense that the later mark brings the earlier mark to mind, is not sufficient;

(j) the reputation of a mark does not give grounds for presuming a likelihood of confusion simply because of a likelihood of association in the strict sense;

(k) if the association between the marks creates a risk that the public will wrongly believe that the respective goods or services come from the same or economically-linked undertakings, there is a likelihood of confusion.

The average consumer and the nature of the purchasing decision

22) As the case law above indicates, it is necessary for me to determine who the average consumer is for the respective parties' goods. I must then determine the manner in which these goods are likely to be selected by the average consumer in the course of trade. In *Hearst Holdings Inc, Fleischer Studios Inc v A.V.E.L.A. Inc, Poeticgem Limited, The Partnership (Trading) Limited, U Wear Limited, J Fox Limited*, [2014] EWHC 439 (Ch), Birss J. described the average consumer in these terms:

“60. The trade mark questions have to be approached from the point of view of the presumed expectations of the average consumer who is reasonably well informed and reasonably circumspect. The parties were agreed that the relevant person is a legal construct and that the test is to be applied objectively by the court from the

point of view of that constructed person. The words “average” denotes that the person is typical. The term “average” does not denote some form of numerical mean, mode or median.”

23) Both parties’ specifications have the term “clothing”. Such goods will be sold in, inter alia, traditional retail outlets on the high street, through catalogues and on the Internet. The specifications of both parties are unlimited, and so I must keep all of these trade channels in mind. The average consumer of the goods at issue is a member of the general public (including businesses) who is likely, in my opinion, to select the goods mainly by visual means. I accept that more expensive items may be researched or discussed with a member of staff. In this respect I note that in *New Look Ltd v OHIM Cases- T-117/03 to T-119/03* and T-171/03, the General Court (GC) said this about the selection of clothing:

“49. However, it should be noted that in the global assessment of the likelihood of confusion, the visual, aural or conceptual aspects of the opposing signs do not always have the same weight. It is appropriate to examine the objective conditions under which the marks may be present on the market (*BUDMEN*, paragraph 57). The extent of the similarity or difference between the signs may depend, in particular, on the inherent qualities of the signs or the conditions under which the goods or services covered by the opposing signs are marketed. If the goods covered by the mark in question are usually sold in self-service stores where consumer choose the product themselves and must therefore rely primarily on the image of the trade mark applied to the product, the visual similarity between the signs will as a general rule be more important. If on the other hand the product covered is primarily sold orally, greater weight will usually be attributed to any aural similarity between the signs.”

And

“50..... Generally in clothes shops customers can themselves either choose the clothes they wish to buy or be assisted by the sales staff. Whilst oral communication in respect of the product and the trade mark is not excluded, the choice of the item of clothing is generally made visually. Therefore, the visual perception of the marks in

question will generally take place prior to purchase. Accordingly the visual aspect plays a greater role in the global assessment of the likelihood of confusion.”

24) In the same case the Court also commented upon the degree of care the average consumer will take when selecting clothing. It said:

“43. It should be noted in this regard that the average consumer’s level of attention may vary according to the category of goods or services in question (see, by analogy, Case C 342/97 *Lloyd Schuhfabrik Meyer* [1999] ECR I-3819, paragraph 26). As OHIM rightly pointed out, an applicant cannot simply assert that in a particular sector the consumer is particularly attentive to trade marks without supporting that claim with facts or evidence. As regards the clothing sector, the Court finds it comprises goods which vary widely in quality and price. Whilst it is possible that the consumer is more attentive to the choice of mark where he or she buys a particularly expensive item of clothing, such an approach on the part of the consumer cannot be presumed without evidence with regard to all goods in that sector. It follows that that argument must be rejected.”

25) Clearly, the average consumer’s level of attention will vary considerably depending on the cost and nature of the item at issue. However, to my mind even when selecting routine inexpensive items of clothing such as socks, the average consumer will pay attention to considerations such as size, colour, fabric and cost. **Overall, the average consumer is likely to pay a medium degree of attention to the selection of items of clothing.**

Comparison of goods

26) In the judgment of the Court of Justice of the European Union (CJEU) in *Canon*, Case C-39/97, the court stated at paragraph 23 of its judgment that:

“In assessing the similarity of the goods or services concerned, as the French and United Kingdom Governments and the Commission have pointed out, all the relevant factors relating to those goods or services themselves should be taken into account. Those factors include, inter alia, their nature, their intended purpose and their

method of use and whether they are in competition with each other or are complementary”.

27) In *Gérard Meric v Office for Harmonisation in the Internal Market*, Case T- 133/05, the General Court (GC) stated that:

“29. In addition, the goods can be considered as identical when the goods designated by the earlier mark are included in a more general category, designated by trade mark application (*Case T-388/00 Institut fur Lernsysteme v OHIM-Educational Services (ELS)* [2002] ECR II-4301, paragraph 53) or where the goods designated by the trade mark application are included in a more general category designated by the earlier mark”.

28) In *YouView TV Ltd v Total Ltd*, [2012] EWHC 3158 (Ch), Floyd J. (as he then was) stated that:

"... Trade mark registrations should not be allowed such a liberal interpretation that their limits become fuzzy and imprecise: see the observations of the CJEU in Case C-307/10 *The Chartered Institute of Patent Attorneys (Trademarks) (IP TRANSLATOR)* [2012] ETMR 42 at [47]-[49]. Nevertheless the principle should not be taken too far. Treat was decided the way it was because the ordinary and natural, or core, meaning of 'dessert sauce' did not include jam, or because the ordinary and natural description of jam was not 'a dessert sauce'. Each involved a straining of the relevant language, which is incorrect. Where words or phrases in their ordinary and natural meaning are apt to cover the category of goods in question, there is equally no justification for straining the language unnaturally so as to produce a narrow meaning which does not cover the goods in question."

29) The goods of the two parties are:

Opponents' specification	Applicant's specification
Clothing & footwear	Clothing; Leisure clothing; Sports clothing; Jerseys [clothing]; Casual clothing.

30) To my mind the goods of the opponents' mark fully encompass the whole of the goods the applicant is seeking to register. **The goods of the two parties must be regarded as identical.**

Comparison of trade marks

31) It is clear from *Sabel BV v. Puma AG* (particularly paragraph 23) that the average consumer normally perceives a mark as a whole and does not proceed to analyse its various details. The same case also explains that the visual, aural and conceptual similarities of the marks must be assessed by reference to the overall impressions created by them, bearing in mind their distinctive and dominant components. The CJEU stated at paragraph 34 of its judgment in Case C-591/12P, *Bimbo SA v OHIM*, that:

“.....it is necessary to ascertain, in each individual case, the overall impression made on the target public by the sign for which registration is sought, by means of, inter alia, an analysis of the components of a sign and of their relative weight in the perception of the target public, and then, in the light of that overall impression and all factors relevant to the circumstances of the case, to assess the likelihood of confusion.”

32) It would be wrong, therefore, to artificially dissect the trade marks, although it is necessary to take into account their distinctive and dominant components and to give due weight to any other features which are not negligible and therefore contribute to the overall impressions created by them. The marks to be compared are, for ease of reference:

Applicant's mark	Opponents' mark
Swild	SWILDENS

33) The marks have obvious visual and aural similarities as they share the first five letters. Equally they have obvious visual and aural differences in that the opponents' mark has an additional three letters, which when the applicant's mark consists only of five letters is an

obvious and significant difference. Neither mark has any meaning in relation to the goods in question. In my opinion the average consumer will view both marks as surnames as they are used to items of clothing carrying the surname of the founder of the company or the designer.

Distinctive character of the earlier trade mark

34) In *Lloyd Schuhfabrik Meyer & Co. GmbH v Klijsen Handel BV*, Case C-342/97 the CJEU stated that:

“22. In determining the distinctive character of a mark and, accordingly, in assessing whether it is highly distinctive, the national court must make an overall assessment of the greater or lesser capacity of the mark to identify the goods or services for which it has been registered as coming from a particular undertaking, and thus to distinguish those goods or services from those of other undertakings (see, to that effect, judgment of 4 May 1999 in Joined Cases C-108/97 and C-109/97 *Windsurfing Chiemsee v Huber and Attenberger* [1999] ECR I-0000, paragraph 49).

23. In making that assessment, account should be taken, in particular, of the inherent characteristics of the mark, including the fact that it does or does not contain an element descriptive of the goods or services for which it has been registered; the market share held by the mark; how intensive, geographically widespread and long-standing use of the mark has been; the amount invested by the undertaking in promoting the mark; the proportion of the relevant section of the public which, because of the mark, identifies the goods or services as originating from a particular undertaking; and statements from chambers of commerce and industry or other trade and professional associations (see *Windsurfing Chiemsee*, paragraph 51).”

35) The opponents' mark has no meaning that I am aware of in respect of the goods for which it is registered. Although not a common surname in the UK it is not unusual for surnames to be used on clothing, and would be, in my opinion, recognised as such by the average consumer. To my mind, it **has an average degree of inherent distinctiveness**. The opponents have provided some evidence of use but has failed to put the evidence of

turnover into context of market share, or even to comment upon the size of the UK market for such products. It is obvious that the market share will be extremely small, given the vast size of the UK clothing market. To my mind, the opponent **cannot benefit from an enhanced degree of distinctiveness through use in relation to the goods for which its mark is registered.**

Likelihood of confusion

36) In determining whether there is a likelihood of confusion, a number of factors need to be borne in mind. The first is the interdependency principle i.e. a lesser degree of similarity between the respective trade marks may be offset by a greater degree of similarity between the respective goods and vice versa. As I mentioned above, it is also necessary for me to keep in mind the distinctive character of the opponents' trade mark as the more distinctive the trade mark is, the greater the likelihood of confusion. I must also keep in mind the average consumer for the goods, the nature of the purchasing process and the fact that the average consumer rarely has the opportunity to make direct comparisons between trade marks and must instead rely upon the imperfect picture of them he has retained in his mind. Earlier in this decision, I concluded that:

- the average consumer for the goods is the average UK citizen who will select the goods by predominantly visual means, although I do not discount aural considerations and who is likely to pay a medium degree of attention to the selection of the goods.
- the opponents' mark has an average degree of inherent distinctiveness but cannot benefit from an enhanced distinctiveness through use in relation to any of the goods relied upon.
- The goods of the two parties are identical.
- The marks of the two parties have both differences and similarities visually and aurally. I believe that both will be seen as surnames as this is common practice upon clothing.

37) I also take into account the views expressed in *L.A. Sugar Limited v By Back Beat Inc*, Case BL O/375/10, where Mr Iain Purvis Q.C., as the Appointed Person, explained that:

“16. Although direct confusion and indirect confusion both involve mistakes on the part of the consumer, it is important to remember that these mistakes are very different in nature. Direct confusion involves no process of reasoning – it is a simple matter of mistaking one mark for another. Indirect confusion, on the other hand, only arises where the consumer has actually recognized that the later mark is different from the earlier mark. It therefore requires a mental process of some kind on the part of the consumer when he or she sees the later mark, which may be conscious or subconscious but, analysed in formal terms, is something along the following lines: “The later mark is different from the earlier mark, but also has something in common with it. Taking account of the common element in the context of the later mark as a whole, I conclude that it is another brand of the owner of the earlier mark.

17. Instances where one may expect the average consumer to reach such a conclusion tend to fall into one or more of three categories:
- (a) where the common element is so strikingly distinctive (either inherently or through use) that the average consumer would assume that no-one else but the brand owner would be using it in a trade mark at all. This may apply even where the other elements of the later mark are quite distinctive in their own right (“26 RED TESCO” would no doubt be such a case).
 - (b) where the later mark simply adds a non-distinctive element to the earlier mark, of the kind which one would expect to find in a sub-brand or brand extension (terms such as “LITE”, “EXPRESS”, “WORLDWIDE”, “MINI” etc.).
 - (c) where the earlier mark comprises a number of elements, and a change of one element appears entirely logical and consistent with a brand extension (“FAT FACE” to “BRAT FACE” for example).”

38) I note that in *Sutaria v. Cheeky Italian Ltd* (O/219/16), the Appointed Person expanded on the decision in *L.A. Sugar* at 16, noting:

- “16.1. First, a finding of a likelihood of indirect confusion is not a consolation prize for those who fail to establish a likelihood of direct confusion. It should be kept in mind that the differences which mean that one mark would not be mistaken for the other might well dispel indirect confusion as well.
- 16.2. Second, if (as here) the differences between the marks are such that there is no likelihood of direct confusion, one needs a reasonably special set of circumstances for a finding of a likelihood of indirect confusion. This is what Mr Purvis was pointing out in those paragraphs in *LA Sugar* .
- 16.3. Third, when making a finding of a likelihood of indirect confusion, in my view it is necessary to be specific as to the mental process involved on the part of the average consumer. Whilst the categories of case where indirect confusion may be found is not closed, Mr Purvis' three categories are distinct, each reflecting a slightly different thought process on the part of the average consumer.”

39) In *Duebros Limited v Heirler Cenovis GmbH*, BL O/547/17, Mr James Mellor Q.C., as the Appointed Person, stressed that a finding of indirect confusion should not be made merely because the two marks share a common element. In this connection, he pointed out that it is not sufficient that a mark merely calls to mind another mark. This is mere association not indirect confusion.

40) In view of all of the above, and allowing for the concept of imperfect recollection, despite the identity of the goods the differences between the trade marks of the two parties are such that there is no likelihood of consumers being indirectly or directly confused into believing that the goods provided by the applicant are those of the opponent or provided by an undertaking linked to it. This is because the average consumer is well versed in noticing small differences between surnames, and this is how these marks will be viewed given the common practice of using surnames to identify the source of clothing. **The opposition under Section 5(2) (b) therefore fails.**

CONCLUSION

41) The opposition under section 5(2)(b) fails totally and trade mark 3665324 can proceed to registration.

COSTS

42) As the applicant has been successful it is entitled to a contribution towards its costs. However, the applicant represented itself and did not return the costs proforma. I therefore decline to award any costs in the case.
